

Need Surgery?

Thanks to Compass Group, surgery through Transcarent costs you \$0.* If surgery is in your future take these 5 simple steps to get the care you need through Transcarent.

Connect with your Care Team

Download the Transcarent app to message the Care Team or connect by phone.

Get an expert second opinion

Get a second opinion consultation at no additional cost to help you feel confident about a diagnosis, treatment plan, surgery, or medication.

Select a surgeon

You'll be matched with a selection of top-quality providers that have delivered exceptional results; you'll choose where to have your surgery.

Prep for surgery

All arrangements will be made for you in advance—all you have to do is show up.

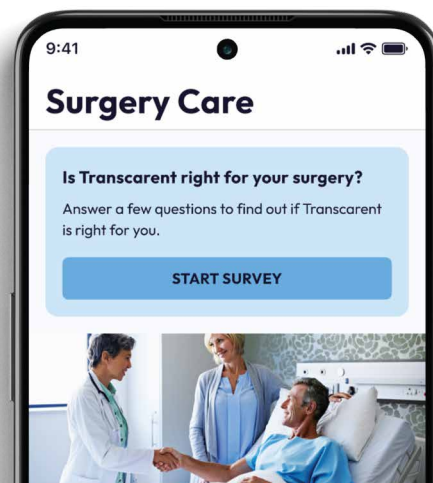

Recover

Get back to yourself—we'll check on you after your procedure!

Available surgical procedures

- Bariatric**

*Transcarent is available to members (age 18+) enrolled in an eligible Compass Group medical plan. The programs and services offered to members enrolled in a Regional HMO will vary. Your surgery costs, one pre-operative appointment, one post-operative appointment, anesthesia, surgical site fees, and medications given in the facility for your procedure are covered under this benefit. If a local surgeon is not available and travel is required, travel expenses for the patient and an adult companion, including airfare, lodging, and meals allowance are also covered when arranged through Transcarent.

**Starting January 1, 2026, coverage for bariatric, joint, and spine procedures will only be approved when coordinated through Transcarent. If you have any questions or concerns, please contact your Care Coordinator at 888-483-0865. Please note that procedures completed outside of the Transcarent network may not be covered. If you've already started your surgery journey for one of these procedures, contact a Care Coordinator to discuss possible exemptions or waivers.
