## CHARGING.

The MINI Aceman includes a Mode 3 Charging Cable for public charging and the MINI Charging Card as standard, granting you access to the continuously expanding public charging network. If you wish to charge your MINI at home, the optional Mode 2 Flexible Fast Charging Cable with 3-pin plug can be purchased, or you have the option to install a Wallbox with our partner [Pod Point](#). A guide to charging times and rates are below, these are dependent on the local electricity infrastructure:

TYPE	RATE	E (hrs:mins)	SE (hrs:mins)
<b>HOME CHARGING (AC 0-100%)</b>			
Charging with Mode 2 cable (Flexible Fast Charger with 3-pin plug)	2.3kW	20:30	28:45
Charging with Wallbox	7.4kW	6:45	9:00
<b>PUBLIC CHARGING (AC 0-100%/DC 10-80%)</b>			
AC charging with Mode 3 cable	11kW	4:15	5:30
DC charging at max charge rate E/SE	70kW/95kW	00:28	00:31

### Prices and Specifications.

MINI UK reserves the right to alter prices and specifications without notice. MINI UK has made every effort to ensure the accuracy of information but does not accept liability for any errors or omissions.

\* = The MINI Aceman is a battery electric vehicle requiring mains electricity for charging. Whilst we recommend the battery for this vehicle is charged to 80% to help optimise the life of your battery, the electric range figure shown is the WLTP figure after the battery had been fully charged to 100%. WLTP figures are shown for comparability purposes. Only compare fuel consumption, CO<sub>2</sub> and electric range figures with other cars tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the starting charge of the battery, accessories fitted (post registration), variations in weather, driving styles and vehicle load.
