

CMCP423

Evaluating Chinese Medicine Clinical Practice

General information

Awards	Subject type	Study year	Study Semester
Bachelor of Health Science (Chinese Medicine)	Core	Year 4	Semester 8

EFTSL: 0.125

Delivery mode:

- Weeks 1-12: On campus single day attendance (100% attendance required)
- Weeks 1-12: Livestream and online

Co-requisites: CMCP422

Pre-requisites: Nil

Subject overview

This capstone clinical subject involves case-based discussions, tutorials, and clinical placements at Endeavour's clinical practice facilities, where students consolidate their Chinese medicine knowledge and skills. In clinical placements, students practice independently, demonstrating readiness for professional practice. They will apply their skills in acupuncture, Chinese remedial massage (tui na), individualised herbal medicine, Chinese dietetics, lifestyle therapies, biomedical sciences, clinical management, and counselling. Emphasising a patient-centred, evidence-informed approach, students will also explore the role of Chinese medicine within an inter-professional healthcare model. Through critical reflection and data analysis, students will evaluate their clinical training and develop a professional plan to support their post-graduation transition and ongoing professional development.

Assessments: Continuous Skills Assessment, Practical Assessment, Oral Presentation (Capstone Project)
