

NATC425A

Naturopathic Clinical Practicum 3A

General information

Awards	Subject type	Study year	Study Semester
Bachelor of Health Science (Naturopathy)	Core	Year 4	Semester 8

EFTSL: 0.1875

Delivery mode: On campus

Co-requisites: NMDH311

Pre-requisites: NATC412

Subject overview

Senior clinic students at Endeavour Teaching Clinics will enhance their naturopathic skills by leading primary consultations (including via Telehealth), conducting client assessments, and case analyses. They will support less advanced students while advancing their expertise in naturopathic case taking, ethical communication, and interdisciplinary teamwork. Key skills include interpreting pathology reports, understanding client conditions, and applying evidence-informed naturopathic treatments. Students will integrate naturopathic philosophy in managing diverse client cases, addressing both acute and chronic conditions.

This subject is clinical practicum undertaken in a working clinic, treating clients from the general public. To prepare the students for professional practice, this subject requires the student to maintain 100% attendance across the on-campus timetabled clinic sessions for the full 12 weeks.

Assessments: Continuous Skills Assessments
