#### Subject overview

In this subject, students will learn advanced counselling skills, and the theory and practice of the crisis intervention. Students will further develop their active listening, communication, engagement, and feedback skills, learning how and when to apply Solution Focused approach and Motivational Interviewing. The aim is to provide a formal accidental counselling training for students who are not trained to be counsellors with the opportunity for the students to: reflect on their own conditioned responses and further develop healthy professional and personal boundaries and a variety of self-care strategies while demonstrating compassionate, culturally safe, and effective accidental counselling techniques.
