## Work and safety garments

Wevotex has the knowledge and expertise in-house for the design and production of high-quality work and safety garments.

By using fabrics and trimmings from European renowned suppliers and by producing close to Netherlands, the lines are short in terms of control and communication, resulting in efficient and fast production.

Wevotex guides you from the first idea to the delivery of what you had in mind. Together we develop a customer-specific garment package that takes into account fashionable and ergonomic design, industrial washability, comfort and a good price-quality ratio.

When, looking at the working environment of the user, safety requirements are set for the garments, we will ensure that the garments are certified according to the European (EN) standards.

If, in addition to the delivery of an initial order, there is a need for a continuous flow of the products you have chosen, the service can be expanded in the field of stock keeping of raw material and / or end product.

Finally, you can trust that our garments are produced under the right social working conditions. Our producers are ISO certified for quality, working conditions and the environment.
