

Perfect Bound Books

How to supply artwork guide

Page specifications

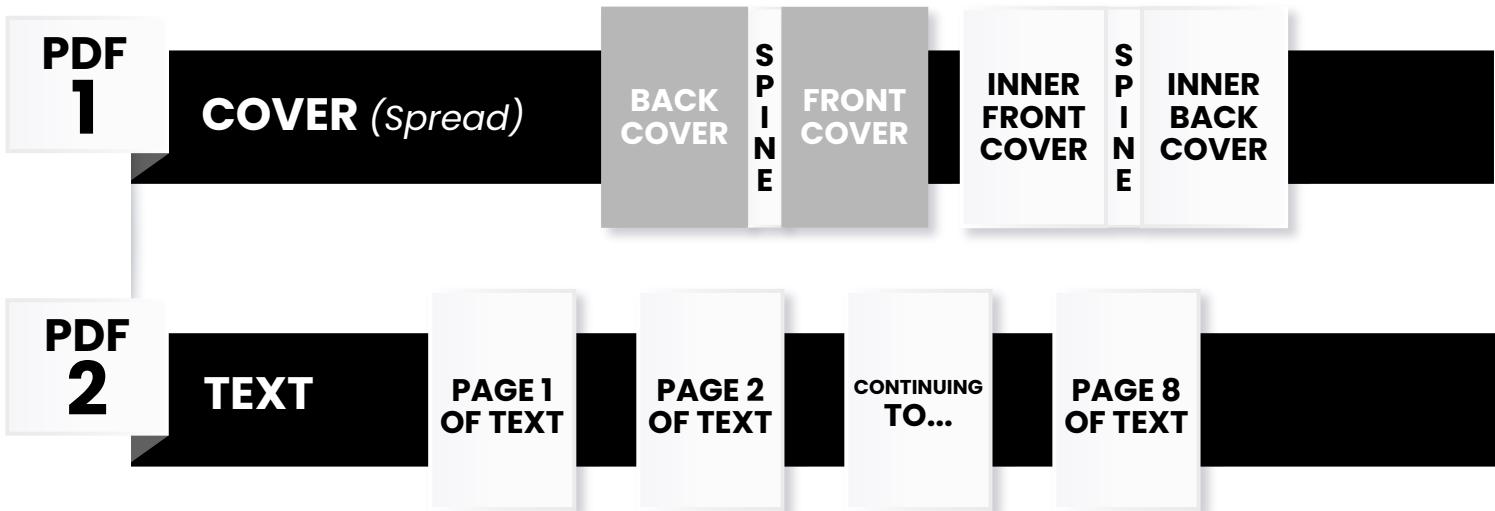

Perfect Bound page totals must be divisible by 2 and supplied as multi-page PDFs in the correct reading order.

Example:

12-page booklet – Files should be supplied as two PDFs:

- 1 **Cover:** 2 spreads (Outer and Inner)
(Each spread must include a front, back, and spine)
- 2 **Inners:** 8 pages
(All remaining internal pages in order)

Example file setup

Supplying cover spreads

For perfect bound books, the cover must be supplied as a wrap-around spread. When exporting from InDesign, select "Spreads" to ensure the back, spine, and front form one continuous layout.

Crucially, your spine width must be accurately calculated to match your page count and paper thickness; if the spine is incorrect, the cover will not fit the book block.
