

Stitched Books

How to supply artwork guide

Page specifications

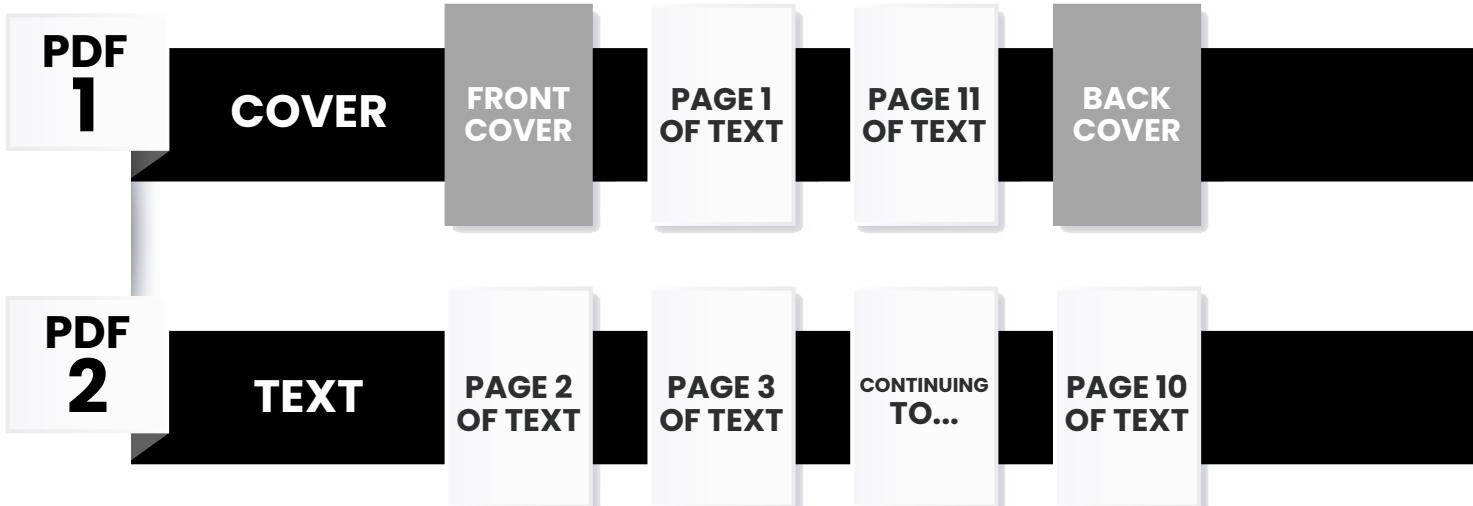

Stitched booklet page totals must be divisible by 4 and supplied as multi-page PDFs in the correct reading order (**from front to back**).

Example:

12-page booklet – Files should be supplied as two PDFs:

- 1 **Cover:** 4 pages
(Front cover, page 1 of text, page 11 of text, back cover)
- 2 **Inners:** 8 pages
(All remaining internal pages in order)

Example file setup

Page creep and margins

In a stitched booklet, the thickness of the paper causes inner pages to push out further than the outer ones. Because these edges must be trimmed to keep the booklet flush, more paper is removed from the center pages.

While our software adjusts for this "creep," we recommend keeping text and images at least 5mm from the page edges to ensure no important content is trimmed off.
