Hardback Books
How to supply artwork guide

Page specifications
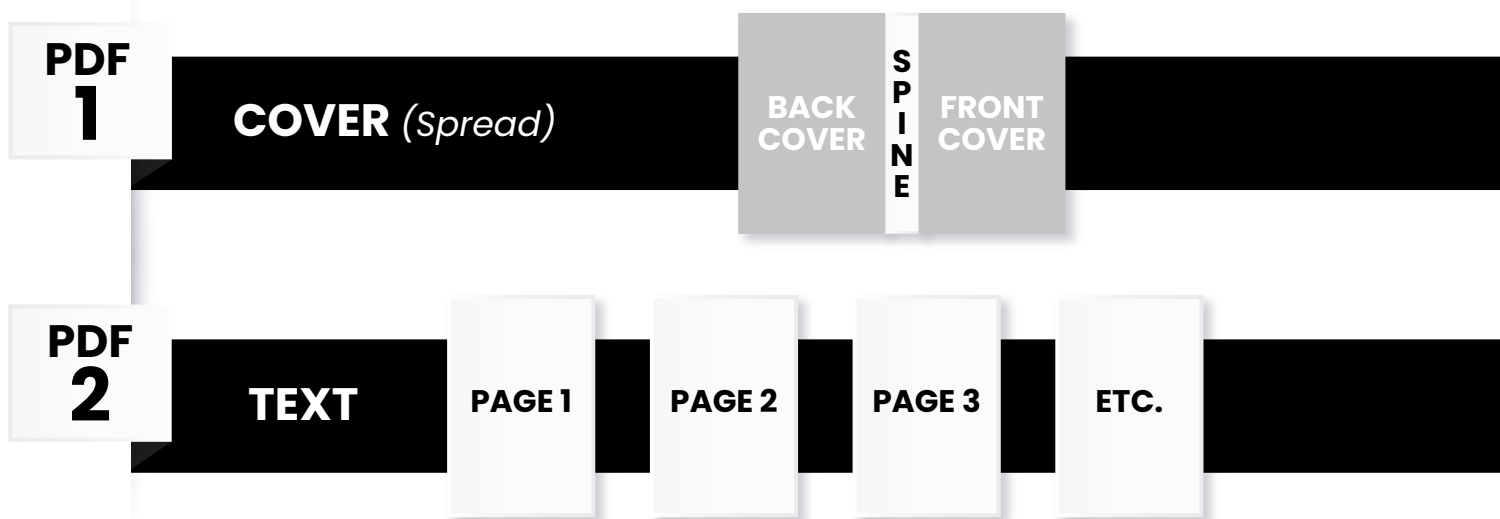

Casebound page totals must be divisible by 2, supplied as multi-page PDFs in the correct reading order.

Example:
32-page booklet – Files should be supplied as two PDFs:

1 **Cover:** 1 spread
(Spread must include a front cover, back cover, and spine)

2 **Inners:** 30 pages
(All remaining internal pages in order)

Example file setup

PDF 1

COVER *(Spread)*

BACK COVER | SPINE | FRONT COVER

PDF 2

TEXT

PAGE 1 | PAGE 2 | PAGE 3 | ETC.

Supplying cover spreads

For Hardback books, the cover must be supplied as a wrap-around spread. When exporting from InDesign, select "Spreads" to ensure the front, spine, and back form one continuous layout.

Crucially, your spine width must be accurately calculated to match your page count and paper thickness; if the spine is incorrect, the cover will not fit the book block.

! Avoid placing text within 10mm of the inner edge for maximum readability.
