Electric Vehicle 10 Year Forecasts

Global electric vehicle (EV) sales are set to reach new heights, with major car markets already announcing long-term bans on sales of petrol and diesel models. Access to reliable and comprehensive intelligence on the fastest growing segment of the autos industry is now paramount for manufacturers, suppliers, utilities, and infrastructure providers as they implement their strategies for success.

We now offer an expanded data set for the EV sector. You will now have access to **more than 50 markets** where electric vehicles are sold. This includes forecasts for passenger electric vehicles and commercial electric vehicle segments where data segmentation is available. This will allow you to quantify demands for EV's, measure development in the sector, plan investments and judge the impact on related industries.

Unique to BMI, this new, proprietary dataset has been researched at source and is the ONLY database of its kind on the market. It cuts through the noise and provides a reliable picture of the sector on a country-by country level:

Historical EV Sales & Fleet Data up to 10 Years	10 Year Forecasts for EV Sales & Fleet	Battery EV and Plug-in Hybrids Penetration Rates
Commercial EV Forecasts for 37 Markets	Detailed Data for 53 Countries	Download data in Excel Format
