

LILLY'S RESPONSE TO COVID-19

Lilly's purpose **– to make life better –** has never been more important.

— David A. Ricks, Chairman and Chief Executive Officer

Lilly is bringing the full force of our scientific and medical expertise to attack the coronavirus pandemic around the world. We're focused on ensuring a reliable supply of medicines, keeping our employees safe and pushing scientific efforts to **defeat this virus**. We're also committed to supporting our communities, including reducing strain on the medical system.

Supplying Medicines

Supplying medication to nearly **40 million people** across 125 countries

Operating all **14 Lilly manufacturing sites** during the pandemic, including sites in Europe, the U.S., Brazil, Japan and China

Keeping the **flow of medicines** and supplies moving across borders, despite challenges

Keeping Our Employees Safe

- More than **25,000 employees** working from home
- For employees who must be in our facilities to make and supply medicines, numerous steps were taken to keep them safe and ensure social distancing
- To support employees' mental and physical well-being, new programs including team mindfulness practice 3 x each week and personal resilience training were launched in the UK and Northern Europe, alongside check-in forums for employees worldwide

Supporting Our Communities

- **Reduced strain** on the medical system:
 - Donated PPE around the world, including face shields produced by our engineers in Spain
 - Paused new clinical trial starts and enrollment for most programs at the height of the pandemic
 - Partnered with Irish scientists to develop a key component of the COVID-19 testing process to **ease testing delays in Ireland**
 - **Donated equipment** to support testing in the UK including a **PCR machine and thermal cyclers**
- Joined a **cross-industry collaboration** of 17 life sciences companies and the Bill & Melinda Gates Foundation
- **Thousands of employees have volunteered**, including medical professionals serving in hospitals and staff delivering medicines in the U.K.
- **Donated more than £500,000 to the Red Cross** across the UK and Northern Europe, and supported charities that are focused on providing immediate support to people who are at higher risk of severe COVID-19 through our **COVID-19 Emergency Fund**
- Around the world, Lilly, our employees and the Lilly Foundation have given **more than \$2.2 million in donations** to date in response to COVID-19,

“We are moving at top speed to
create a potential treatment
to help patients.”

— Daniel Skovronsky, M.D., Ph.D.
Chief Scientific Officer and President, Lilly Research Laboratories

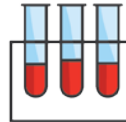

Attacking the Pandemic

Confronting this pandemic with everything we can, through R&D in Lilly's own labs and partnerships with other companies and the government

Working to develop new **potential therapies** as well as testing existing medicines with potential to address COVID-19, including supporting investigator initiated trials in the UK and Denmark

Repurposed labs at Lilly Corporate Center to conduct diagnostic testing in the U.S. for COVID-19

Lilly does not accept money from government agencies, hospitals, insurance companies or patients for conducting or analyzing tests
