I am the owner or agent for the owner of the above described animal and have the authority to execute this consent. I hereby consent and authorize the performance of the following procedure(s) and/or operation (s) _____.

I also authorize the use of appropriate anesthetics, and other medication, and I understand that hospital support personnel will be employed as deemed necessary by the veterinarian. I have been advised to the nature of the procedures or operations and the risks involved. I realize that results cannot be guaranteed. I have read and understand this authorization and consent.

Please read carefully and sign.

Your pet is scheduled for a procedure that requires anesthesia. We would like to take this opportunity to recommend pre-anesthetic testing and explain why it is important to the health of your pet.

Like you, our greatest concern is the well being of your pet. Before placing your pet under anesthesia, a veterinarian will perform a complete physical examination to identify any existing medical conditions that could complicate the procedure and compromise the health of your pet.

Because there is always the possibility a physical exam alone will not identify all of your pet's health problems, we strongly recommend a pre-anesthetic profile (a combination of tests) be performed prior to anesthesia. The tests we recommend are similar to and equally as important as those your own physician would run if you were to under go anesthesia.

It is important to understand that a pre-anesthetic profile does not guarantee the absence of anesthetic complications. It may, however, greatly reduce the risk of complications as well as identify medical conditions that could require medical treatment in the future.

Mini Panel The combination of blood tests we recommend pets less than 7 years old.

BUN	Creatinine	ALKP	Price <u>\$102.25</u>
ALT	Glucose	Total Protein	
Albumin	Globulin	Electrolytes	

Extensive Panel The combination of blood tests we recommend for pets 7 years old and older.

BUN	Creatinine	ALKP	Price <u>\$138.00</u>
ALT	Glucose	Total Protein	
Albumin	Total Bilirubin	Phosphorus	
GGT	Cholesterol	Calcium	
Globulin	Electrolytes		

Please complete the recommended testing prior to administering anesthesia to my pet.

Signature of Owner _____

I decline the recommended pre-anesthetic tests at this time and request you proceed with anesthesia. I understand that a medical condition may exist which would be impossible to identify during a physical exam alone. I understand that my pet's health could be at risk if such a condition goes undetected when my pet is placed under anesthesia.
