

Our Principles: COVID-19 Antibody Therapy **Pricing and Access**

As Lilly continues to bring the full force of our scientific and medical expertise to fight COVID-19, we're also outlining our vision for equitable, affordable access to our therapies.

Allocation

Treatment will be allocated based on **unmet medical needs globally**

Patient Cost

Our goal is for **patients to have no out-of-pocket costs** for our antibody treatments, wherever possible

Pricing to Health Systems

Equitable government pricing will be **tiered based on country's ability to pay**

During the global pandemic, Lilly is striving to bring value to patients and the overall healthcare system by supplying therapeutic options that help to reduce costs related to hospitalizations, emergency room visits, and other adverse outcomes associated with COVID-19.

**Lilly's purpose – to make life better – has never been more important.
