GuardianEye: Continuous AI-driven attack surface defence

Real-time visibility, automated risk detection, and expert validation to strengthen enterprise security
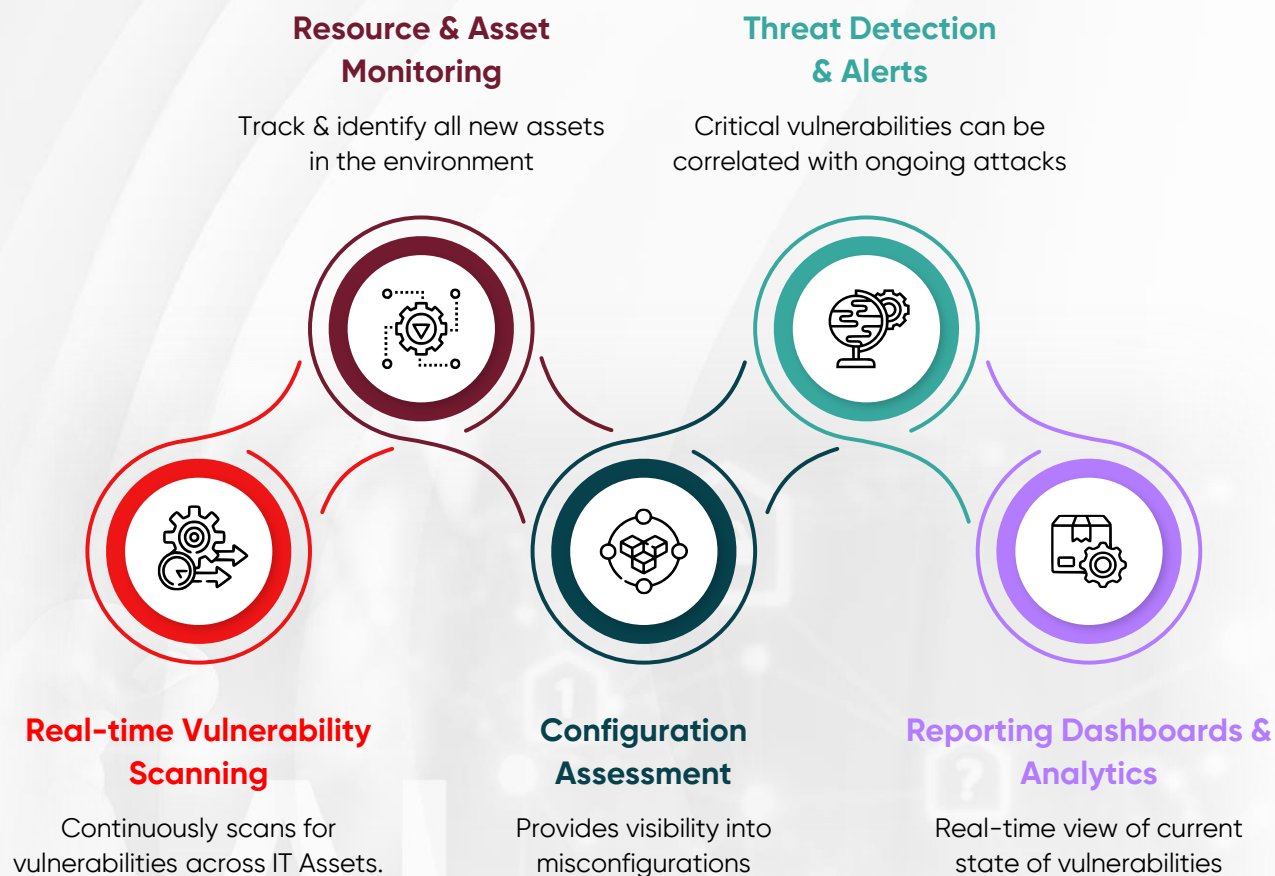

Organizations today face expanding digital footprints and constant cyber threats. GuardianEye simplifies security by continuously monitoring external attack surfaces, detecting real-world risks, and validating vulnerabilities with expert review—enabling faster response and stronger resilience.

Methodology

GuardianEye combines agentic AI, continuous scanning, and annual manual penetration testing to deliver high-fidelity, validated insights. Its real-time dashboards and automated reporting help teams prioritize fixes and maintain a strong security posture.

Agentic AI based continuous exposure management – cost-effective assurance

Resource & Asset Monitoring

Track & identify all new assets in the environment

Threat Detection & Alerts

Critical vulnerabilities can be correlated with ongoing attacks

Real-time Vulnerability Scanning

Continuously scans for vulnerabilities across IT Assets.

Configuration Assessment

Provides visibility into misconfigurations

Reporting Dashboards & Analytics

Real-time view of current state of vulnerabilities

Traditional Way

Frequency: Performed periodically

Focuses on identifying vulnerabilities at a specific point in time

Continuous Assessments

Frequency: Continuous monitoring, providing real-time insights

Output: Provides ongoing visibility into vulnerabilities, allowing for prioritization and remediation as they arise

Key Benefits

- Improved Security Posture
- Faster Remediation
- Realtime Reporting
- Help automate assessments demonstrating adherence to regulations like PCI-DSS
- Cost Effective

GuardianEye – Continuous EASM – Key Features

01 Asset Inventory

- Company name
- Top Level domain
- Subdomains
- Public IP ranges & ports
- Internet Facing Websites
- Technologies Used
- Websites Status

02 Agentic Attack Surface Enumeration

- Agentic Orchestration of understanding enumeration steps , data and tool calling
- Subdomain Enumeration
- Public IP Enumeration
- TCP, UDP port scan
- Service Enumeration
- Frameworks, OS, Web servers, CMS
- Reverse DNS Lookup

03 Advanced Continuous Vulnerability Scanning

- Vulnerability Scanning - Identify security weaknesses.
- Latest CVE scans
- AI Based Risk Analysis and Recommendations
- Expert Validation for False positive Reduction

04 Reports

- Monthly Expert validated attack surface and vulnerability Reports in Excel along with mitigation recommendation
- Stakeholder meeting to explain remediation
- Yearly one-time in-depth Automated+ manual penetration testing along with 1 retesting and clean report for compliance

Monthly Validation

Monthly validation to remove False Positives

Yearly Penetration Testing

Yearly Manual Penetration Testing

MINDSPRINT
Intelligence. Engineered.

Mindsprint reimagines business through talent, technology, and insight-driven solutions.

With a proven track record spanning two decades, the company has enabled digital transformation for clients in over 60 countries, spanning diverse industries such as retail, agriculture, manufacturing, healthcare and life sciences.

Mindsprint offers a differentiated suite of services, including enterprise technology applications, business process services, and cybersecurity solutions.

Mindsprint is headquartered in Singapore, with a strong global presence across the US, UK, Middle East, India, Australia and Africa.
